Expert Concrete Polishing, Specification & Training

A specialty division of Blastrac/Diamatic Global

Expert Concrete Polishing, Specification & Training by DMS

Diamatic Management Services (DMS) is an expert in concrete polishing, specification and training backed by over 15 years of experience in retail, industrial and commercial floor markets. DMS' ULTRA-FLOOR® and ULTRA-FLOOR® Premium are specifically designed processes that produce an extremely hardened, dust-proofed, reflective surface that imparts chemical, abrasion and stain resistance to concrete floors.

DMS specifies, trains, and equips its customers through the ULTRA-FLOOR® system to turn ordinary concrete floors into highly decorative, quality floor surfaces that will resist chemicals, abrasions, and stains from penetrating.

ULTRA-FLOOR® is a multi-step process incorporating a mechanical application of progressively finer diamond grinding of concrete floor surfaces with applications of patented Flor-Sil® lithium harder and Flor-Guard® hybrid-lithium finish. These environmentally friendly, VOC compliant liquids are finished through simple steps utilizing Flor-Grit® diamond polishing pads.

The ULTRA-FLOR® System by DMS Produces Stunning Results

Benefits with ULTRA-FLOR®:

- High quality decorative floor
- Allows transmission of water vapor through the slab where hydrostatic pressure's an issue
- Process is virtually dust-free, allowing the use of the facility during floor installation
- No dusting of the concrete floors after installation
- Long lasting, extremely low-maintenance floor
- Results produce a "green" floor due to improved lighting efficiency, use of current structure, and water-only maintenance system
- Variable-finish products are available to produce multiple degrees of gloss with a full spectrum of colored concrete dyes to choose from

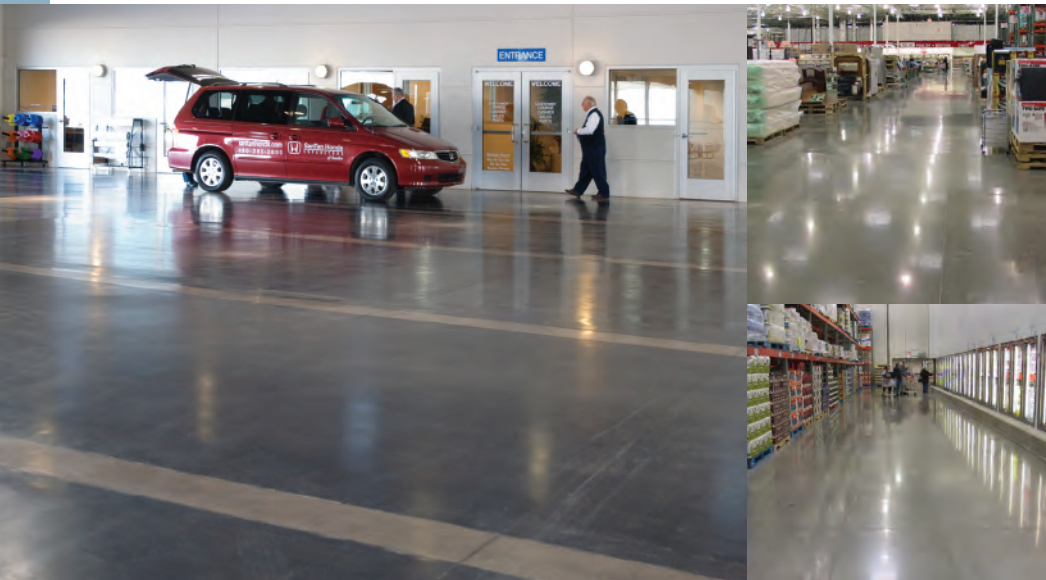

These colors are only a representation of available dye colors and are not guaranteed. Actual results may vary, depending upon slab color. Test in inconspicuous place for best results.

Expert Concrete Polishing, Specification & Training

Professional Training + Quality Equipment = Expert Results

Diamatic BMG-780PRO
Grinder Polisher

Diamatic BMG-535PRO
Grinder Polisher

Diamatic Management Services is a division of Blastrac/Diamatic NA that provides professional training and specification for polished concrete floors. Utilizing the best in training and manufacturing from Blastrac and Diamatic, DMS certifies contractors to be the best in professional concrete polishing. DMS is committed to excellence and will be an integral part of every floor system to ensure consistent quality and repeatability of finished results.

DMS offers its customers:

- Nationwide coverage and training program
- Top rated certification system
- Proven innovation in equipment and processes
- Full-range of quality machines & consumables
