## For Use in Coloring and Densifying with UV Protection

### DESCRIPTION

**Flor-Color™ Interior/Exterior** is a stainable concrete and terrazzo densifier, formulated with the latest hybrid-lithium chemical technology and is designed for use on outdoor concrete. Used in the **Diamatic Management Services (DMS)** recommended system for coloring outdoor concrete, **Flor-Color™ Interior/Exterior** penetrates into concrete surfaces, providing brilliant color, longer life, and higher durability. **Flor-Color™ Interior/Exterior** is an environmentally friendly treatment that is mixed with any UV stable color pigment suitable for a clear base. Together, **Flor-Color™ Interior/Exterior** and **Ultra-Flor™** produce a concrete/terrazzo surface with improved abrasion resistance and reduced surface dusting. With proper installation, **Flor-Color™ Interior/Exterior** will not leave clouding effects that can be difficult to remove. **Flor-Color™ Interior/Exterior** is an easy to apply product, that can achieve the perfect colored surface look you want. **Flor-Color™ Interior/Exterior** will not contribute to alkali-silica reactivity (ASR). **Flor-Color™ Interior/Exterior** inhibits alkali salts (efflorescence) and sweating in concrete/masonry surfaces. **Flor-Color™ Interior/Exterior** and the **Ultra-Flor™ System** extend the life of the concrete, while enhancing the appearance of the surface. Ultimately, this results in superior durability and lower life-cycle costs in comparison to all floor coating/covering systems. **Flor-Color™ Interior/Exterior** will be available in Clear for customer custom tinting, plus 12 factory colors that include: Black, White, Grey, Red Oxide, Bright Red, Yellow Oxide, Bright Yellow, Green, Blue, Beige, Burnt Umber, and Walnut. These popular colors are offered for ease of use in obtaining a pleasingly-colored polished concrete floor through the DMS **Ultra-Flor™ System**.

### ADVANTAGES & BENEFITS

- Deepens clarity and heightens reflectivity (gloss)
- Penetrates and seals existing hardened floors
- User friendly, non-whitening
- Easy to use and maintain
- Increases abrasion resistance
- Use any color pigment specified for use in a clear base, from your local paint supplier
- Extends the service life of the floor
- Improves chemical and water resistance
- Environmentally friendly—VOC compliant
- Reduces alkalinity / efflorescence
- For outdoor use.

### COVERAGE

300 to 600 sq. ft. per gallon. Note: Coverage or treatment yield will vary with concrete quality, porosity, finish, and environment.
