

TOW PRO

TOW BEHIND WATER TANK TROLLEY

The Tow-Pro H20 is a 10-gallon water tank trolley that attaches to your 735-P for wet grinding applications. The water tank allows for additional water in the wet grinding process. The unique location and attachment of the tank eliminates the inconsistent head weight when attached above the heads. The trolley attaches to your rear stiffener behind the propane tank using a bracket that is bolted to the stiffener. This attachment will let the operator the ability to wet grind for a couple of hours without having to replenish the water tank.

RECOMMENDED EQUIPMENT

BMG - 735 Propane
